

Shelby County RFP # 13-003-54
Bid Question and Answers

<u>Section/Page</u>	<u>Question</u>
Section II, p.5	Are subcontractors, service providers, or third party lessors required to complete the EOC documentation? Or, is this required by the bidder only? Only the prime contractor and LOSB vendors are required to have a current EOC number.
Section VII, p.10	Can you advise your anticipated schedule of equipment replacement? Is there an initial quantity for immediate roll-out? This will be by arrangement. As mentioned in the RFP and at the pre-bid meeting, County is seeking a partner relationship where the vendor will use their expertise to physically assess the needs of each department and recommend appropriate solutions prior to deploying appropriate equipment – we are not necessarily seeking a like-for-like replacement for what’s already there.
Section VII, p.11	Do you anticipate all in-scope devices to be on the network by contract start? No (see previous answer). We anticipate initial needs assessments will occur first, followed by equipment deployment. The entire process will take three to four months.
Section IX, p.12	a) The RFP states a lease option. Please specify what lease terms you are interested in: 36-, 48-, 60-month, or other? County has reviewed the lease options and decided it is not appropriate for its needs. Bidders should quote rental pricing, plus monthly accessory cost, plus metered charge, or an all-inclusive (rental plus meter) charge plus accessories b) Do you want rental pricing? Yes, or an inclusive per-click charge per previous response c) Is Shelby County also interested in a purchase option? No.
Section IX, p.12	Are staples to be included or priced separately? Included
Section IX, p.12	Re: short term rentals: Please share the purpose of these units and how often these would be needed. This is <u>very</u> infrequent – County may need to setup a temporary office for a particular program that runs anything from a week to several months
Section IX, p.14	Are the current MFP's being used to scan to OnBase? If so, how is this being accomplished today? No
Section IX, p.14	What are the methods that OnBase has been configured to accept scanned documents? Kofax Capture through a scheduled import process
Section IX, p.14	When scanning documents into OnBase are the metadata fields required to be input at the time of the scan? No
Section IX, p.14	<i>"The County reserves the option to increase or decrease the number of systems within the contract term."</i> Is the County interested in a flex pool program? Can be submitted as an alternative or option
Section IX, p.15	Is End-of-Term Removal to be included in lease pricing? Vendor would be responsible for equipment removal at contract termination irrespective of lease/rental/pay-per-use

Section IX, p.15 *"Contractor is responsible for delivery of additional or replacement equipment and shall be fully functional within 10 working days from requested date."* Is this referring to equipment delivered during the initial install? **No**

Section XI.C p.26 Will the County accept a summary of relevant qualifications for each individual engaged in our services, in lieu of resumes due to their personal and confidential nature? **Yes**

--- May we obtain a copy of Konica Minolta's response from the prior award?
Please let us know if this can be emailed or faxed to us and if there is a charge.
Vendors may ask to review the last bid by e-mailing Edna Ward in the County Attorneys Office @ edna.ward@shelbycountyttn.gov and asking to review the bid under the Tennessee Open Records Act.

--- Will the County be responsible for property taxes on leased equipment? **N/A**
Will the County sign 3rd party stand alone lease agreements? **N/A**

--- How often has the County had to cancel equipment that you have had under lease? **To the best of my knowledge, never**

--- Are your leases coterminous with the contract date?

--- Can you advise when the documents identified at the pre-bid meeting, i.e., list of accessories, locations, will be posted to the County website? **This has been provided – note that the list is current as of March, but is in a constant state of change due to equipment MAC's.**

Shelby County RFP #13-003-54
Bid Questions and Answers # 2

1. In Section X Contract Requirements Paragraph 4 conditions for Termination or Abandonment are addressed.

It is our understanding that the contract will be awarded for a 3 year term with 2 one year extension options.

- a. During the first 3 years, we assume the contract can be cancelled for non-appropriation of funds, correct? **Correct – this is a usual term for government organizations that are budgeted on an annual basis**
 - b. What are guidelines or criteria for determining “failure to provide services” in 4b on page 17? **A persistent failure to meet the maintenance and service requirements as mentioned in various sections of IX (Purpose) and X (Contract Requirements).**
 - c. In reference to 4c on page 17, is it correct that the contract can be canceled for the convenience of the county or the vendor at either party’s sole discretion without stating a reason? **Correct. This is a standard contract clause (it exists in the current copier contract).**
2. In reference to Section II, item 7 on page 4, the vendor is required to demonstrate financial capability. What criteria will the county accept to demonstrate this? **Three years of financials and a bank reference with Point of Contact information.**
3. Does the county require that the copier vendor bill the County directly **Yes** or will billing from a third party leasing company such as GE, CIT, Bank of America, etc be acceptable? **No.**
4. Or must the leasing agreement be held with the awarded vendor and invoicing to the County come directly from the vendor **Yes**
5. Will the County sign a “traditional” lease document with a third party leasing company, **No** or will the county be furnishing its own contract? **No**
 - a. If the county is using its own contract, can a sample be provided? **N/A**
6. Can the vendor use a “private label” lease document that is essentially a third party lease from a company such as CIT, Bank of America, etc, that has had the vendor’s label applied to it? **No – at this time the County prefers a conventional ‘per click’ agreement, plus monthly charges for accessories, or a rental agreement plus charges.**
7. What are the equipment specifications for copy and print speed, scan speed, paper capacity, finishers, etc? **As stated in an earlier response, the County wishes to establish a partnership with a selected vendor, who will provide expertise in assessing the needs of each department and then provide an appropriate, cost-effective solution. County is not mandating a like-for-like replacement of existing equipment.**

8. On page 15 of the RFP document, a statement is made that surge protectors are the responsibility of the vendor "if provided."
- Who determines if the surge protectors are required? **Vendor**
 - Is the county aware that not having surge protectors can result in unwelcome machine errors such as a document jamming during a power surge? **Yes**
 - Would it be in the county's best interest to require the vendor to provide surge protectors? **No**
 - Does the County recognize that if a vendor chooses not to include surge protectors, it would result in a significant pricing advantage over a vendor who recognizes the importance of including them with every machine so that the above mentioned unwelcome machine malfunctions are not experienced by the County after installation?
 - Will the County clarify if surge protectors are mandatory on all machines? Surge protectors are not mandatory on any machine. **The County does not mandate surge protectors. In a conventional copier agreement risk as a consequence of power surges rests with the vendor, and the vendor might elect to take appropriate steps to mitigate that risk or not. Generally the County power supplies are stable – some outlets are already on protected circuits. Bidders can elect to quote their pricing ex-surge protection, and negotiate with the County where they believe some instability exists.**
9. On page 15, specification for 2 days of training on production machines are mentioned and there are production machines listed on the equipment list provided with the RFP document.
- Are the production machines in the print shop included in the scope of this RFP? **No – we received a request today to remove the production machines from the scope of the RFP. This will lower the anticipated monthly volume by 17,000**
 - If production machines in the print shop are covered under the scope of this RFP, are there any equipment specifications for controllers, print quality, paper stocks, etc which would be needed by the print shop personnel to produce the documents required by the print shop? **N/A**
 - Does the County intend to only require the vendor to provide 2 hours of training on production equipment with no further training during the contract period? **N/A**
10. Is there a standardized form or format instructions for submitting pricing? **No.**
On page 14, 5th full paragraph from the top, vendors are required to state what is being offered in unequivocal terms under each item in the specifications, and that if more space is required to list it on a separate sheet.
- Page 4 item II 6 refers to an attached specification and pricing schedules. **Paragraph II (6) should read "Respond fully, attaching specifications and pricing schedules"**
 - No specification or pricing schedule sheets were included in the main RFP document or any of the other documents listed on the County's Purchasing website.
 - Will the County be providing those sheets? **No**
11. Only 120 of the 378 current units are connected to the County's network system currently.
- Will the number of devices that require connectivity increase? **Yes**
 - If so, which departments does the County anticipate requiring connectivity on the new contract? **All devices should connect to the various County network domains wherever**

possible. These are: Administration, SC Sheriff, Trustee, Head Start and Assessor. Any cabling requirements and costs will be a Shelby County expense.

12. Page 25 Section C Proposal Format mentions a required document that must be included in the response. Is this three page document the only standardized form for the RFP response? **Yes**
13. Page 25, Item 2a. requires the vendor to outline it can meet or exceed the minimum requirements.
 - a. For the purposes of fulfilling this response, is the County referencing the Section II Minimum Proposer Requirement listed on Page 4 items 1-15? **No, although the requirements on Page 4 1-15 are important, the minimum requirements also encompass QoS – the ability to meet or exceed the services level requirements stated in the RFP document**
 - b. Item 6 mentions the attached specification and pricing schedules but none are included in the RFP document nor are any listed as attachments on the County Purchasing website listing for this RFP. **See response to Q:10**
14. There was discussion during the pre-bid meeting that the current or pending fax server RFP may be integrated into this RFP. Will this RFP require the provisions for a fax server solution? **No – the fax server is a separate project, and will be selected from products tested and approved by Avaya Inc., our telecom equipment provider. We anticipate the fax server being installed prior to equipment rollout, but cannot guarantee it. Bidders should quote fax-cards as an optional accessory – they are not an absolute requirement for every system, only for those systems that cannot be connected to the network and have a dedicated 1FB ‘phone line.**
15. There was discussion in the pre-bid meeting about Post Script being mandatory for all machines. Will the County please clarify that Post Script is a mandatory requirement a listed in the current RFP? **It is a mandatory requirement**
16. Will machines require the ability to index documents at the control panel when being scanned?
No, indexing is a process performed by OnBase
 - a. If so, how many machines, in which departments will require this ability?

- b. If so, what back end solution will the control panel indexing need to interface with?
- 17. Does the County manage print drivers from centralized print servers or are they loaded individually on PC's? **Drivers will be loaded to centralized print servers by County technicians.**
- 18. In regards to driver installation:
 - a. Does vendor furnish drivers to the County for County IT staff to load and manage or does vendor load and manage drivers at its expense? **County IT staff load driver software**
 - b. Will the County grant vendor software permissions and access for loading and maintaining drivers or servers? **No – County is a HIPAA and PCI compliant entity, and cannot permit this**
 - c. If the vendor is required to deploy and manage the drivers down to the individual PC level, please describe the County's current software deployment processes for drivers and other PC applications and how the County envisions the vendor managing drivers within the existing County software deployment process. **County will deploy**
- 19. There was discussion about the role of current County employed printer technicians play in the maintenance of the current printer fleet.
 - a. What are the specific tasks that those printer technicians are currently tasked with? **County does not employ dedicated "printer technicians". County network technicians support all services from the closet to desktop, which includes bench repair and maintenance of laser-printers.**
 - b. Which of those tasks will the County require of the vendor under the terms of the new contract? **None. County will continue to maintain laser-printers until such time as an Output Fleet Management solution is agreed (with the current partner or via a new RFP process). Printer maintenance will then transition, but will always exclude access to the network and print-servers.**
- 20. Please elaborate on the County's vision for a Fleet Management Solution.
 - a. Does the County want an analysis to "right size" all devices and is it receptive to the idea that not all need to be "copiers?" **Yes**
 - b. Does the County want to set parameters for what type or speed of machine should be placed in each department according to analyzed need and output volume? **No – this selection should be made based on the perceived business needs, taking into account the recommendations of our business partner**
 - c. Or, does the County desire the vendor to offer general solution suggestions? **Yes.**
- 21. What is the grading criteria for the RFP scoring?
 - a. Is there a breakdown of points or percentage for pricing, solution proposed, vendor capabilities, references, etc? **No breakdown is provided. The scorecard generally breaks down into three areas:**
 - 1. Meeting the 'Minimum Requirements' section of the RFP
 - 2. An assessment of proposed solution and capabilities per the RFP
 - 3. References
 - 4. Cost**Cost is the highest-scoring single element of the RFP scorecard.**
